Time Warner Cable Channel 11 Access Changed to Digital

Time Warner Cable has moved the City's Government Access Channel 11 to a digital tier and cable subscribers will need digital equipment to continue viewing the channel.

Digital equipment includes a digital set-top box or CableCARD-equipped UDGP or digital TVs equipped with a QAM tuner.

Time Warner is offering customers with Standard cable service the use of a digital set-top box free for one year. Basic service customers can get a digital box free until Dec. 31, 2015.

As of today, the City of Wichita Falls Channel 11 is only viewable with digital equipment. For customers with a QAM tuner TV, the City of Wichita Falls channel can be viewed on QAM Channel 11.3.

Call Time Warner Cable at 1-800-CABLE 55 to find out how to get the free digital equipment. To view the channel lineup, visit www.timewarnercable.com/TEXAS.

Other channels affected by this change are the MSU educational access channel, which will be digital Channel 2 or QAM Channel 11.1, and the WFISD educational access channel, which will be digital Channel 14 or QAM Channel 11.4.

For more information, call Time Warner Cable at 1-800-CABLE 55.
